GENERAL INFORMATION

The Tasserion clip-on sensor is developed for indirect measurement of the medium (water) by clipping it onto a pipe. The clipping system makes a quick and certain fit which offers a cost advantage in installation and servicing. The clipping is simple and there is no chance of breaking thanks to the strong red Polyamide housing.

Eventhough the sensor features indirect measurement it still has a short response time and high accuracy as a result of the smart construction and the use of high quality materials.

Tasserion has this sensor EN 60730-2-9 approved, which means it can also be used as a safety device. Even more advantage can be achieved by having two NTC's in one housing. In combination with compatible electronics one NTC can be used for temperature controlling and the other for safety. One product, one assembly, two functions.
